EDUCATION

Thakur Institute of Management Studies, Career Development & Research

2024

Master in Computer Application - 8.0 CGPA

Mumbai, Maharashtra

Patkar Varde College

2022

Bachelor in Computer Science - 9.62 CGPA

Mumbai, Maharashtra

Work Experience & Projects

Arithwise Solutions – Associate Software Engineer

July 2024 – Present

1. SEC Filings Data Mining and Analysis Platform

- Designed and deployed a full-stack web platform to parse and summarize SEC filings using stock tickers, enabling real-time company tracking.
- Designed and integrated a LLaMA-based NLP pipeline to extract, structure, and summarize insights from legal documents.
- Implemented a watchlist & email automation system that sends answers to critical financial questions from new filings.
- Tech Stack: Python Flask, PostgreSQL, JavaScript, LLaMA, HTML/CSS

2. WAF Defendo – Intelligent Web Application Firewall

- Developed a multi-tenant Web Application Firewall using Docker, Nginx, ModSecurity, and Python to protect applications from OWASP Top 10 attacks.
- Built a real-time log ingestion and analytics pipeline to process ModSecurity audit logs into MongoDB with geo-enrichment and risk scoring.
- Processed and analyzed high-volume security logs with near real-time latency using a scalable MongoDB pipeline.
- Designed and deployed ML-based threat detection using Char-CNN, BiLSTM, and Transformer models for real-time attack classification and risk prediction.
- Integrated ML predictions into the WAF pipeline to correlate blocked requests with deep threat analysis results.
- Automated SSL certificate provisioning and renewal using Let's Encrypt ACME.
- Tech Stack: Docker, Nginx, ModSecurity, Python (Flask, FastAPI), TensorFlow, Next.js, PostgreSQL, MongoDB

TECHNICAL SKILLS

- ETL & Data Orchestration:** Real-time & pipelines, Databricks Jobs, CI/CD pipelines
- Big Data & Cloud:** Azure, Databricks, PySpark
- Programming & Scripting:** Python, Java, SQL
- Databases:** PostgreSQL, MySQL, MongoDB
- DevOps & Tools:** Azure DevOps, Git, Terraform, Jira
- Web & API:** Flask, REST APIs, HTML, CSS, JavaScript
- Design & Visualization:** Figma, user-centric dashboards
- Core CS:** Data Structures, Algorithms, OOP, System Design Basics
- Testing:** Unit Testing, API Testing
- Architecture:** Microservices, RESTful Design

CERTIFICATION PROGRAMS

- Tata Data Visualization: Empowering Business with Effective Insights Job Simulation on Forage - July 2024
- The Python Programming AZ Definitive Diploma(Udemy)
- Programming in Java (Nptel)
- CSS and JavaScript and PHP(Udemy)

Professional Engagements & Initiatives

- Actively engaged in work-related travel to facilitate collaboration across teams and drive project success.
- Completed 120+ hours of extension activities in IT awareness, women empowerment, and education.
- Volunteered in a community initiative to improve digital literacy for senior citizens.
